Things You Probably Didn't Know About Nuclear Energy in Pennsylvania

1

FIVE NUCLEAR ENERGY PLANTS

38%

of Pennsylvania's electricity

93%

of its clean power

Without it, consumers would spend
\$6.6 BILLION
more over the next 10 years and would need to
import about 12% of its total electricity
needs from other states.

2

3

Nuclear supports nearly

16,000 jobs

across the state &

\$69 million

in state tax revenue

The operations of 5 nuclear plants avoid

37 MILLION

tons of carbon emissions each year,
the equivalent of keeping

8 MILLION

cars off the road.
